

Mercedes-Benz CLA, MY 2014 Center Seating Position

Page 1 of 1

Access to tether anchor is difficult

Note: Information on folding the rear seatback forward can be found on the "Mercedes-Benz CLA, MY 2014 Outboard Seating Positions" page.

Above: There is very little space between the head restraint and TA cover; it might be difficult for some to open the TA cover.

Left: Pushing down and back on the raised lip of the TA cover will open it. Also, the head restraint can be raised to provide easier access.

Above: To attach the tether to the TA place it over the TA, with your hand under the head restraint, and push down as shown until you hear it click. If the head restraint is removed you will be able to see what you are doing but always replace it before installing the CR.
